

# Cultural impact on local community in Eastern-Macedonian region of Maleshevo through the eyes of an archaeologist

#pubarchMED

PUBLIC ARCHAEOLOGY IN  
THE MEDITERRANEAN  
CONTEXT APRIL 16-18, 2021

Nations, cultures, societies drag their roots, symbols, and narratives from the past.

Archaeology as a scientific discipline, it has its unique contribution in the development on the society, through the excavations, promotions, and protection on cultural heritage, but also tourism, wider economic development and especially the richness of cultural life of different communities.

Presentation and protecting of cultural heritage should be big part of modern day societies.
